Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant wanted to discuss the embodiment disclosed in Liu et al. with a stronger core than shell, which is the opposite of the application. Examiner noted that Liu et al. does disclose an embodiment having a stronger shell than core as well as listing the same materials that are in the application. Examiner also noted that since the materials are the same and the application does not focus on the method of making the copolymers, one of ordinary skill in the art could manufacture the materials to have a Young's Modulus of 3.0 GPa or less..
